Professional Summit (I-LIPS 2018)**

**Special Libraries Association
(SLA, USA), Asian Chapter**

The libraries around the world have been facing unprecedented changes due to the growing digital and ICT revolutions in the recent past. Libraries expect both evolution and revolution in present time to reshape and reinvent themselves not only to respond to the pressures of users and technology, but to be flexible enough to adapt to the world of tomorrow.

Libraries need to deal with increased competition from rising users expectations, which is brought about by convenience and availability of advance technologies on the web. The challenge for libraries is to understand the technologies that are reshaping and will continue to reshape the future and how to strategically adapt themselves. The way users think about libraries is already changing dramatically. With increasing digitization and inter-connectivity, it is important for libraries to cultivate an ecosystem of innovation around its users. Implementation of innovative technologies in libraries like use of self service printing, improved scanning solutions, use of drones for delivering books, mobile technologies for disseminating information, electronic publishing and knowledge organization systems, cloud computing applications, data mining and text analytics, augmented reality, context-aware computing and several other technological tools is becoming very essential. **The International Conference on Reshaping Libraries: Emerging Global Technologies and Trends (ICRL-2018)** is going to discuss these and other pressing issues for librarians around the world and would also aim at identifying technologies that would suit the libraries and LIS Professionals. The International Conference is being organized as part of the **Silver Jubilee Celebrations of DELNET - Developing Library Network** in collaboration with the Ambedkar University, Delhi; Society for Library Professionals (SLP) and Special Libraries Association (SLA, USA), Asian Chapter from February 1-3, 2018.

About Organisers

DELNET - DEVELOPING LIBRARY NETWORK

DELNET- Developing Library Network was established as a Society in 1992. It was initially supported by the Department of Scientific and Industrial Research, National Informatics Centre, Ministry of Communication and Information Technology, Government of India. It is located in Jawaharlal Nehru University (JNU) Campus, New Delhi. DELNET is a major resource sharing library network in South Asia connecting nearly 6000 libraries in India and eight other countries. These libraries include academic libraries (Universities and Colleges), government libraries, libraries of R & D organisations, among others. DELNET provides access to millions of resources comprising e-books, e-journals, and other resources including more than 3 crore records of books, journals, periodical articles, video-recordings, sound recordings, theses and dissertations etc. DELNET has recently launched the Discovery Portal for member-institutions. DELNET provides the Inter-library Loan and document delivery service which is the best in South Asia. The service is being offered to promote resource sharing at the national and international levels among member-libraries of DELNET. In order to modernise and network libraries, DELNET provides DelPlus - the Library Management Software free of charge to member-libraries. DELNET also offers support for installing Koha software to its member libraries. DELNET has a consortium for e-books and e-journals.

DELNET arranges training programmes, lectures, workshops and the National Convention on Knowledge, Library and Information on Networking (NACLIN) every year.
